

## Press Release

14.03.11

Soliton IT is pleased to announce Soliton Reporting+™.

Soliton Reporting+™ is the next generation of Soliton's popular Workflow Manager. The new product uses the latest technology from Microsoft to provide an enhanced user experience, with highly efficient workflow, cached worklists, activity monitoring and of course built-in reporting & document creation software.

The product is ideal for clinical departments requiring an efficient workflow management system capable of reporting, document creation, speech recognition, digital dictation and activity monitoring.

The product is IHE compliant (DICOM, HL7, XDS), and includes Soliton's advanced workflow software and the company's popular speech processing technology.

Compatible with most PACS, RIS and clinical systems.

The company will be showing the product at the UKRC conference in June this year and it will be available for commercial release in Q3/2011.

Making the announcement Bob Watson, Director said:

***"We are pleased to announce Soliton Reporting+. The product is an evolution of our popular Workflow Manager. It uses the very latest technology from Microsoft and our proven speech processing technology to provide even better workflow and efficient document creation.***

***Soliton Reporting retains the robustness, reliability and interoperability of Soliton's Workflow Manager and includes cached worklists, activity monitoring, dashboards and graphic visualisation of statistics.***

***As with our other products, Soliton Reporting+ provides users with an efficient, easy to use reporting tool, enabling improved workflow and faster document creation, which ultimately results in a better service for patients"***

**Soliton IT:** Soliton IT is a leading provider of speech recognition, digital dictation and workflow management systems for healthcare organisations. The company has offices in the UK and Australia.
