

RIS Viewer

Soliton IT have developed a web based application to view legacy RIS databases. The *RIS Viewer* provides an efficient, simple to use and easy to deploy means of looking at your RIS data. Functionality can be further enhanced by adding Soliton IT's fully integrated *Digital Dictation and Real-Time Speech Recognition Systems*.

- Web based with no client software
- Internet Explorer compatible
- Easy to deploy
- Use the system to enquire against legacy RIS Databases
- Can be used with Soliton IT's Digital Dictation and Real-Time Speech Recognition Systems.
- Has a simple, clean and intuitive user interface

- Search for Patients by Identifiers such as the Medicare Number or NHI
- Shows Patient / History / Study / Results / Film tracking details
- Provides RIS database statistics
- Can be upgraded to enquire against other legacy databases (by agreement)
- Distributed Application with built-in scalability
- Uses .NET technology and is ODBC compliant

powered by
SpeechMagic™

This Soliton IT product is an ASP .NET application. The design follows the standard for distributed applications for .NET. The distributed nature of the application provides built in long-term scalability.
