

## Speech Console

Soliton IT have developed a fast, efficient and simple to use software package which can provide *Real-Time Speech Recognition for your existing applications.*

- Speech enable YOUR legacy systems !
- Provides Real-time Speech Recognition for most Applications which run under Windows
- Clean, simple and intuitive user interface.
- Easy to use and easy to deploy
- Fast and efficient. You can dictate directly into your existing application rather than using the keyboard.

Our advanced user interface and management software together with SpeechMagic from Philips make it possible for us to speech enable your existing Windows Applications.

With **Speech Console** you can dictate directly into your system rather than use the keyboard. Just press the mike record button and away you go. Press it again and your dictation transcript is placed directly into your application at the cursor position. It really is that simple! You can even write your emails using Real-Time speech instead of typing!

**Speech Console** is compatible with most Applications which run under windows. It can be a great benefit to Hospitals wishing to Speech enable legacy applications.

Speech Console can be deployed within individual departments or on a Hospital-wide basis, such as for EPR and other applications which do not have Real-time speech recognition already built-in.

- Contexts (dictionaries) available for General Medicine, General Correspondence, Radiology / Cardiology, and Pathology (beta).
- Does NOT require any special integration software.
- Will work 'out of the box' in a Philips SpeechMagic environment.
- Especially useful for speech enabling legacy hospital systems such as EPR and clinical systems which do not have speech built in.
- Speech enable your Email, MS Word, Office etc.
- Can even work with legacy 'DOS' applications and some text based systems (when running under Windows)
- Powerful voice activated Command and Control for editing transcripts.
- Train the system to recognise your voice in just two minutes.
- Has powerful learning capability provided by Philips SpeechMagic.
